

Metstrip SV3405

Product code F3405

Formerly known as Gramos Code 9199

Brush application paint stripper

PRODUCT DESCRIPTION

Metstrip SV3405 is a high speed brush application paint remover designed to remove quickly and cleanly most industrial paint finishes, lacquers and varnishes.

FEATURES AND BENEFITS

- * May be brush applied to both horizontal or vertical surfaces.
- * Effective on most finishes including stove enamels, and non-convertible air dry finishes
- * Non-flammable
- * Low evaporation rate for maximum activity period.

PROPERTIES

Appearance :	Thick colourless opaque gel
Specific Gravity :	1.200
Solubility :	Most organic solvents. Not soluble in water but emulsifies when rinsed away.
Boiling point :	40deg C

METHOD OF USE

Used as supplied, at room temperature.

Apply in thick layers and allow to soak into the paint surface being removed.

Wait until the paint lifts and bubbles.

A second application is sometimes required.

Some non convertible finishes will soften and may need to be scraped or wiped off

Finally rinse off with water or solvent to remove all traces of paint residue and excess stripper prior to drying and repainting

Always rinse wood with solvents as water may cause wood grain to swell.

EQUIPMENT

Brush applied to most surfaces. Beware of plastics and light magnesium alloys.

Rubber components and seals will also swell if left in contact with **Metstrip SV3405** for short periods.

STORAGE AND HANDLING

Wear gloves and full protective clothing including eye shields.

Store in a cool place away from food stuffs and direct sunlight.

Containers should be kept tightly closed and opened cautiously.

Do Not smoke and Do Not apply to hot surfaces. Avoid contact with skin and eyes.

Do Not inhale vapour. Use in well ventilated areas or use local exhaust ventilation.

Dispose of used material in compliance with the Environmental Protection Act (1990)

Metstrip SV 3405 contains solvents which are harmful by inhalation and could cause irreversible changes.
